

TWISTYER GARLIC ROOT SCISSOR

Twistyer Garlic Root Scissor

The perfect tool for your productivity.

Garlic hair-like roots are not easy to cut by hand.

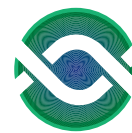

Regular scissors require multiple cuts to trim these roots. The roots want to slide down the blade or bind between the blades.

A by-pass pruner will jam the roots between the anvil and the blade.

The TWISTYER tool is quick and easy to use. The SK7 stainless steel blades are sharp and sturdy. They will not spread or jam. The key is the blade design. In the above image you can see that 1 blade has fine serrations that hold the hair-like roots in place while the other sharp blade cuts them away.

In the other image you can see that the TWISTYER tool is a hand friendly size with easy grip handles.

The TWISTYER tool is quick and easy to use increasing your productivity plus saving you time and effort.
